Dear First Name,

**TIME IS RUNNING OUT!
CLAIM YOUR OPTICAL REBATE TODAY.**

Did you know most health fund rebates run out at the end of each year? This means you have only a limited amount of time left to claim your 2014 optical rebate!

**WHY NOT TAKE ADVANTAGE OF THE PREMIUMS
YOU HAVE ALREADY PAID FOR?**

To make things even more attractive, we can process your health fund claim on the spot. Visit our friendly team in store today to see our fabulous range.

We would also like to remind you how important it is to have your eyes tested on a regular basis. Over time we sometimes fail to notice deterioration in vision strength and quality. We recommend that you have a thorough eye examination every year to maintain optimal eye health and vision.

We will continue to bulk-bill our consultations with Medicare despite reductions in Medicare rebate and the lifting of the fee cap.

We wish you happiness and health during the upcoming festive season and thank you for your support in the last 15 years!

Warmest regards,

Jenny Livanos Optometrist
B.Optomety (Honours), Diploma

Expires | 15th January 2015

Driving and your vision

Ageing can affect many aspects of your vision required for safe driving. These include your ability to see clearly at far distances or to see out of the corner of your eye and your night vision. This can compromise the safety of you and others on the road. In most cases, your optometrist can help you reach the vision standards necessary for safe driving. Regular checkups are very important.

Symptoms to look out for

- Spots in your vision
- Sudden eye pain, discomfort or redness
- Distorted vision
- Double vision
- Decreased colour vision
- Reduced ability to adjust to light changes

TAKE OUR 30 SECOND SELF EXAMINATION FOR MACULAR DEGENERATION

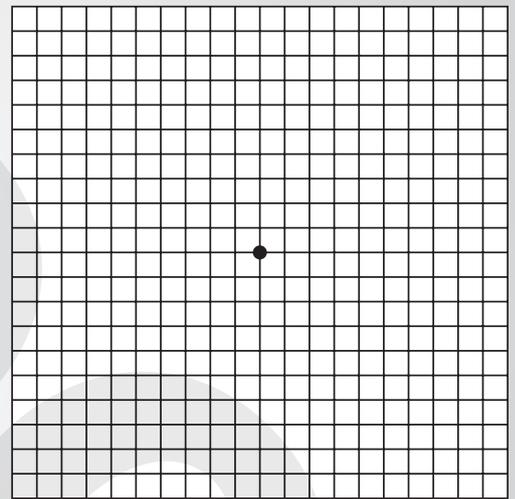

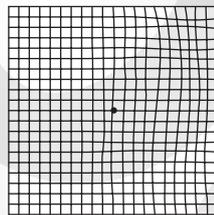

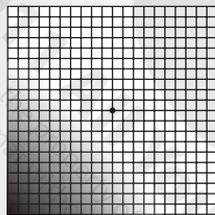

Amsler Grid Macular Degeneration Test

This quick test is designed to give you an indication of the presence of Macular Degeneration. Repeat for both eyes.

1. Do not remove reading glasses or contact lenses
2. Hold this sheet about 35cm (length of page) from your nose
3. Cover one eye and focus on the centre dot with uncovered eye.

Test Results

If you see wavy, broken or distorted lines, or blurred or missing areas of vision, you may be displaying symptoms of MD and should contact us immediately. Do not rely on this as a diagnosis.

CONTACT LENSES

There's an ever increasing range of lenses available to suit almost everyone from age 8 to 80+, with different lenses suiting different lifestyle requirements.

Daily disposables are ideal for everyone and particularly appeal to people wanting the freedom from specs at those special occasions, holidays, swimming or when playing sport.

Multifocals are now available in soft, comfortable materials and are ideal for those wishing to have the same sight distance and near as many years ago!

Astigmatic correcting lenses are also available, even high levels of astigmatism not correctable in the past.

Clear and coloured for light and dark eyes including Freshlook, Novavision and Colorvue. Daily and monthly options are available.

FREE trials for current contact lens wearers. Great prices for new wearers. Normal eye tests are billed through Medicare, with no extra charge.

We proudly supply Nikon optical lenses at Concord Eyecare.

Over the years, Nikon has proved that it can deliver outstanding performance in the most extreme conditions. From missions in the blistering cold weather to the unpredictable environment in space, Nikon has earned the status of a legendary brand. Regardless of your wearing environment, you can expect your Nikon lenses to deliver:

- Superior optics, and reliability
- The latest in optical innovation
- Unparalleled quality and durability
